EDUCATION

JADAVPUR UNIVERSITY

INFORMATION TECHNOLOGY MASTERS

Sep, 2024 - April, 2025

Kolkata, India

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY

BACHELORS INFORMATION TECHNOLOGY

Nov, 2020 - Jun, 2024

Kalyani, India

CGPA: 9.3

SOUTH POINT HIGH SCHOOL

CLASS 12 PCMC

Percentage: 91%

May, 2019 - March, 2020

Kolkata, India

SOUTH POINT HIGH SCHOOL

CLASS 10 AISCE

Percentage: 94%

May, 2017 - March, 2018

Kolkata, India

EXPERIENCE

TCS | AI ENGINEER

Mumbai, India | April 2025 – Present

- Developed a bespoke Retrieval-Augmented Generation (RAG) solution integrated directly into the corporate AI ecosystem. Implemented efficient vectorization strategies for 10k+ flammability records, optimizing query latency to under 200ms while ensuring strict data compliance.
- Orchestrated a multi-stage API workflow for automated document generation. Designed the system to leverage Vector DB filtering logic to dynamically retrieve relevant context, passing refined data to the LLM for high-precision, hallucinations-free report generation.

C-DAC | SOFTWARE DEVELOPER INTERN

Kolkata, West Bengal | August 2023 – November, 2023

- Instrumental in developing an automated report generation software for the VLAP Team, streamlining the dissemination of Stage 1 and Stage 2 reports to partner companies.
- Significantly optimized efficiency by reducing auditor workload by 50%, previously dedicated to manual report creation and distribution.
- This innovative solution expedites the reporting process and enhances collaboration with Company developers.

FUSION TECHLAB | SALES DATA ANALYST

Kolkata, West Bengal | October 2021 – December 2021

- Detail analysis of their past financial audit data to run their audit checks and predicted analysis in dashboard with an accuracy of 90%.
- Conducted Risk assessments of the client by analysis their documents to minimise the risks by 55%.
- Collaborated with senior management team.

CARE AND CLASS | CREATIVE INTERN

Kolkata, West Bengal | March 2021 – May 2021

- Created the company website from scratch using HTML, CSS, JS, Bootstrap and ReactJs.
- Worked closely with the company owner and personalised the website as per the needs.
- Spearheaded the creative development and conceptualization of company logo.

SKILLS

PROGRAMMING LANGUAGES	Python, HTML, CSS, SQL, Unix bash, Rust
LIBRARIES/FRAMEWORKS	Node JS, Numpy, Pandas, OpenCV, Tensorflow, Langchain
TOOLS / PLATFORMS	Tableau, Autocad, Blender
DATABASES	SQL, Mongo DB, Chroma DB

PROJECTS / OPEN-SOURCE

OUTFIT SUGGESTION WEBSITE GEN AI | [LINK](#)

Python, Tensorflow, Javascript, EJS, CSS

- Engineered an innovative solution that combines natural language processing and image recognition, enabling users to receive cohesive outfit ideas tailored to their individual style, weather, and occasion, revolutionizing the fashion recommendation landscape.
- Pioneered the integration of generative AI in a fashion context to provide personalized outfit recommendations. Leveraged cutting-edge algorithms to analyze user preferences and current trends, delivering creative and stylish outfit suggestions.
- A script runs every month that trains the model to the then latest outfits.

IMAGE SEGMENTATION WITH K MEANS CLUSTERING | [LINK](#)

Python, HTML, CSS, Javascript

- Developed a Python project that leverages the power of OpenCV and K-Means clustering for proficient image segmentation, enabling efficient separation of objects or distinct regions of interest within images.
- Demonstrated expertise in computer vision by employing K-Means clustering alongside OpenCV for image segmentation. Developed a user-friendly interface to easily separate and highlight objects, showcasing strong problem-solving skills and practical application of advanced techniques.

PASSWORD AUTHENTICATION & STRENGTH CHECKING SYSTEM | [LINK](#) TypeScript, JavaScript, CSS, HTML, React Js

- Designed an intuitive user interface that educates users about password strength through real-time feedback and suggestions.
- Implemented multi-factor authentication options to provide an additional layer of protection, ensuring a comprehensive and reliable security solution.
- Currently implementing a robust password authentication system utilizing advanced encryption techniques for enhanced security.

CERTIFICATIONS

- Software Engineering Program - **GOLDMAN SACHS**
- Programming, Data Structures and Algorithms using Python - **NPTEL**
- Tools for Data Science - **COURSERA**
